

Off-Site MBE Construction Solutions

Off-Site MBE Construction Solutions

InfraPros manufactures custom hydronic and electrical skids to meet your project's needs, including chiller skids, boiler skids, custom process skids, rainwater reclamation skids, RO/DI water skids, pumping skids, battery and UPS skids, electrical skids, and more.

Our turnkey modular skids are built in our manufacturing facility in parallel with building construction. Once your facility is ready for installation, the completed components will be delivered and placed in its specified location, saving valuable project schedule time and on-site labor costs.

Asset Management

InfraPros exclusively uses the **myZEFER™** facility asset program on each piece of equipment that we manufacture and service. In addition to providing tagging and smart asset documentation services, myZEFER™ also crowdsources repair, safety, and service information about each piece of equipment we service in your facility. When other service providers, manufacturers, safety, and consumer organizations start talking about similar equipment, InfraPros uses this information to predict potential service, safety, or operational issues in your facility.

Every contract comes with an asset tag and lifecycle information account from myZEFER™ by IDSYS.COM on covered equipment.

At InfraPros, we focus on *improving processes*. In today's environment, that includes providing off-site and modular construction services that promote better equipment and material sourcing, pricing, scheduling, and delivery for a safer and more efficient job site.

Benefits to Off-Site Construction versus traditional built-onsite systems:

- Superior equipment and materials procurement
- Hydronic testing is completed before delivery, saving time and ensuring fewer issues during start-up and commissioning
- We produce equipment that is economical in operation and serviceable throughout its lifecycle
- BIM design allows for efficient facility integration
- Less time is needed from project kick-off to completion
- Reduced installation time means minimal project interruptions
- Modular skids allow for ease of assembly, transport, maintenance, and expansion
- Lowered overall project capital cost

About InfraPros

InfraPros is a leader in providing professional contracting services for commercial, industrial, and public customers for off-site construction and ongoing operations.

We specialize in modular pre-constructed skid components and turnkey solutions for HVAC equipment, with a key focus on energy efficiency and maximum reliability and optimization.

What sets us apart? We are a certified Minority-Owned Business Enterprise by the National Minority Supplier Development Council (NMSDC), which allows us to leverage our network to provide superior solutions and promote diversity and inclusion in the industry.

Why Choose Us?

Improved Delivery Schedules

We leverage our business principle of fast vendor pay and MBE network to expedite equipment and materials procurement

Quality

We use Licensed Structural Engineers, Licensed MEP Contractors, and provide UL Certified Construction on demand

Extended Equipment Lifecycle

We use myZEFER to track equipment information, updates, and warranty throughout the equipment lifecycle

Economical Use

By providing complete skid electrical and controls, we assure the most economical operations

MBE & HUB Certified

Minority Business Enterprise (MBE), North Carolina Historically Underutilized Business (HUB) Certified
